Mogo Trails Up and Running

The tape was dropped on the eastern section of Mogo Trails on Saturday 17 August and hundreds of riders lined up to hit the dirt and test the 70+kms of completed tracks.

Riders will literally help shape the network in the lead up to the full trail network opening in early 2025. Getting mountain bikers in on the journey will provide real-time feedback and insights into many aspects of the trails, from navigation

and facilities through to ridability and challenge levels.

As construction and network development progresses, temporary signage has been installed and the 'live' trail details and locations can be accessed digitally through the [Trailforks app](#).
